Professional Summary

Detail-oriented and versatile **Frontend Developer** with over **5 years of hands-on experience** in building responsive, scalable, and user-friendly web applications using **React.js, Next.js, TypeScript, Redux, Context API**, and modern UI frameworks.

Strong background in frontend architecture, API integration, UI/UX implementation, and cloud deployment workflows (AWS, Cloudflare, GitHub CI/CD). Experienced collaborating with cross-functional teams to deliver high-quality digital solutions for corporate clients across industries including logistics, warehousing, automation, and enterprise systems.

A fast learner, reliable team contributor, and problem solver with a strong drive for self-improvement and modern software development practices.

Technical Skills

Frontend: React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, CSS3, HTML5

State Management: Redux, Context API

Backend / Database: Node.js, RESTful API, MySQL, PostgreSQL

Tools & DevOps: AWS EC2, Cloudflare, GoDaddy, CI/CD pipelines, Git

Other: i18n, Responsive Design, Cross-browser Compatibility, Performance Optimization, Framer Motion(Animation), RESTful API integration.

Professional Experience

Front End Developer (React.js)

Dynamic Click Sdn Bhd – May 2025 to Present

Tech Stack: *Reactjs | Nextjs | Javascript | TypeScript | CSS | Tailwind CSS | Redux | Context | RESTful API | AWS EC2 | Cloudeflare | Web3 | Ethers.js | PostgreSQL.*

- Served as the Primary and Only Frontend Engineer, Taking Full Ownership of UX/UI development across several commercial systems including company websites, admin Portal web and member Portal web application.
- Collaborated closely with UI/UX designers to convert Figma prototypes into pixel-perfect UI.
- Built scalable frontend architecture using **React.js**, **React Router**, and **Redux/Context API**.
- Improved performance through **lazy loading**, **code splitting**, **pagination**, and **optimized state management**.
- Integrated complex REST APIs and implemented reusable components across the platform.
- Led Web3 features including wallet connection (MetaMask, WalletConnect) and smart-contract interactions using **Ethers.js/Web3.js**.
- Worked on deployment workflows using AWS EC2, Cloudflare DNS, and GitHub Actions CI/CD.
- Integrated REST APIs and collaborated closely with backend developers to ensure smooth data flow.

Frontend Programmer

Bear IT Enterprise – Nov 2020 to Mar 2025

Tech Stack: *Reactjs | Javascript | CSS | Redux | Context | RESTful API | MySQL workbench | Nodejs | React Native.*

- Built **company portfolio websites**, internal dashboards, and enterprise applications for clients.
- Developed React Native mobile apps for internal company needs.
- Designed and optimized MySQL database schemas for various projects.
- Implemented Node.js backend logic to support frontend features and API integration.
- Delivered solutions such as warehouse management portals, company claiming systems, and conveyor dashboard interfaces.
- Collaborated with backend and QA teams to ensure seamless functionality and smooth deployments.

Information Technology Network Administrator

F&B Equipment Sdn Bhd – Jan 2018 to Aug 2018

- Handled company network troubleshooting tasks and resolved device connectivity issues.
 - Assisted in configuring PCs, laptops, and network devices.
 - Gained foundational experience in IT infrastructure and company system operations.
-

Key Projects

All developed using **React.js, JavaScript, API integration**, and modern UI frameworks.

Company Portfolio Websites: Developed multiple responsive portfolio sites for companies using React.js and Tailwind CSS.

Company Claiming System: Built an internal web application to handle claims processing and approvals.

Multiple Warehouse Management System: Developed a scalable warehouse management interface for inventory tracking and logistics operations.

Conveyor Management System & Dashboard: Implemented real-time conveyor monitoring dashboards and control interfaces using React.js and RESTful APIs.

RAG Chatbot Platform: Next.js frontend with AI-based document parsing, vector embeddings, and multilingual support.

Dynamic Dashboard & TableView Page: Optimized complex state management with Redux and Context API.

Custom UI Components: AutoScrollCarousel, Masonry Gallery, Language Switcher with i18n.

Education

Bsc(Hons) Computing (3+0)

Segi College Subang Jaya – Aug 2018 to July 2018

Major Courses: PHP, Java, Application Development, Database Application Technology, Information Analysis, Principles of Security, Enterprise Web Software Development, User Interface Design, Network and Operation system

Grade: First Class

Diploma in Information Technology

Segi College Subang Jaya – May 2015 to Nov 2017

Major Courses: C#, C++, Basic Math, Database System, Programming with Visual Basic, Data Communication, Web Designing

Grade: 3.41

Languages

- English – Professional
 - Chinese – Professional
 - Malay – Intermediate
-

Expected Salary

RM 6,500 – RM 7,000 (Mid-Level Frontend Developer)
